Buying a battery? One number is not enough.

Ask about kWh and kW
before comparing systems.

AUGZET
ENGINEERS

Energy stored.
Power delivered.

kWh describes stored energy.
kW describes power output.

The output rating limits what can run at the same time. Storage capacity is only part of the answer.

ENGINEERS

Compare the backup you can actually use.

Ask for usable energy capacity.

Ask for backup power and appliance-starting limits.

Ask which circuits are included.

Ask how long it will run the appliances you actually need.
